

| | |
|--|--|
| <i>Basic Electric Circuit Analysis</i> | |
| <i>Chapter One</i> | <i>Introduction</i> |
| System of units | |
| Scientific notation plus Examples | |
| Conversions within and between system of units plus Examples | |
| Symbols | |
| Home work | |
| | |
| <i>Chapter Two</i> | <i>Current and Voltage</i> |
| Atoms and their structure | |
| Current plus Examples | |
| Voltage plus Examples | |
| Conductors and Insulators | |
| | |
| <i>Chapter Three</i> | <i>Resistance</i> |
| Introduction | |
| Resistance: metric units plus Examples | |
| Color Coding for standard resistor values | |
| Conductance | |
| | |
| <i>Chapter Four</i> | <i>Ohm's law, Power, and Energy</i> |
| Ohm's law plus Examples | |
| Plotting Ohm's law | |
| Power plus Examples | |
| Efficiency plus Examples | |
| Energy plus Examples | |
| Home work | |
| | |
| <i>Chapter Five</i> | <i>Series Circuits</i> |
| Introduction | |
| Series Circuits relations plus Examples | |
| Voltage sources in series plus Examples | |
| Kerchief's Voltage Law plus Examples | |
| Interchanging series elements plus Examples | |
| Voltage divider rule plus Examples | |
| Notation for the symbol of ground plus Examples | |
| Internal resistance of voltage sources plus Examples | |
| Voltage regulation | |
| Home work | |
| | |

| | |
|--|--|
| <i>Chapter Six</i> | <i>Parallel Circuits</i> |
| Introduction | |
| Parallel elements plus Examples | |
| Total conductance and resistance plus Examples | |
| Kerchief's Current Law plus Examples | |
| Current divider rule plus Examples | |
| Open and short circuits plus Examples | |
| Home work | |
| | |
| <i>Chapter Seven</i> | <i>Series-Parallel Circuits</i> |
| Descriptive examples | |
| Ladder Networks | |
| Home work | |
| | |
| <i>Chapter Eight</i> | <i>Method of analysis and selected topics</i> |
| Introduction | |
| Current sources plus Examples | |
| Source conversions plus Examples | |
| Current sources in parallel plus Examples | |
| Current sources in series | |
| Determinants plus Examples | |
| Branch current method plus Examples | |
| Mesh analysis (General approach) plus Examples | |
| Mesh analysis (Format approach) plus Examples | |
| Nodal analysis (General approach) plus Examples | |
| Nodal analysis (Format approach) plus Examples | |
| Bridge Networks plus Examples | |
| Y \leftrightarrow Δ And $\Delta\leftrightarrow$ Y conversions plus Examples | |
| Home work | |
| | |
| <i>Chapter Nine</i> | <i>Network Theorems</i> |
| Superposition theorem plus Examples | |
| Theremin's theorem plus Examples | |
| Norton's theorem plus Examples | |
| Maximum power transfer theorem plus Examples | |
| Reciprocity theorem plus Examples | |
| Home work | |
| | |
| | |
| | |

| |
|--|
| <i>Chapter Ten Capacitors</i> |
| The electric field |
| Capacitance plus Examples |
| Transients in capacitive network |
| Charging phase plus Examples |
| Discharge phase plus Examples |
| Instantaneous values plus Examples |
| The current i_C plus Examples |
| Capacitors in series and parallel plus Examples |
| Home work |
